WORK EXPERIENCE

GIA Immobilier   Web developer

-

December 2022 - June 2023   Montreal, Canada

- Designed and developed advanced features for the company's website, enhancing user experience and increasing conversion rates.
- Implemented effective search engine optimization (SEO) strategies to boost the company's visibility on search engines and generate quality organic traffic.

PROJECTS

Ecommerce website - https://github.com/javpot/richricosso_OnlyPHP

- Complete design and development of the website, following best development practices to ensure a smooth user experience.
- Implementation of features enabling users to create an account, add items to their carts, remove items from their carts, and purchase the items.
- Integration of a MySQL database to securely store user information and enable real-time data synchronization. Additionally, the use of the Stripe API for payments.

AH-VELO   -   https://velvety-bunny-cad34a.netlify.app

- As a team lead, I led my team to deliver an impeccable product that meets all our client's requirements (the official site will be online starting from spring 2024).
- Integration of the Setmore API, allowing users to book appointments with mechanics.

EDUCATION

College Ahuntsic

- Diploma of College Studies, Computer Science

August 2021 - May 2024   Montreal, Canada

Award

I had the rewarding experience of serving as a programming tutor, assisting fellow students in their programming journey. I had the privilege of helping them understand complex concepts, tackle coding challenges, and excel in their projects. The professor's recommendation serves as a testament to my ability to provide valuable support.

SKILLS

Python; Java; HTML/CSS - Javascript (NodeJS, Vue.js), PHP; Databases : SQL, NoSQL (MongoDB, MariaDB); Git, Figma,
